// ABOUT_ME

Computer Science undergraduate and CyberSec enthusiast with hands-on experience in IT support, networking, device repair and software rollout support, currently advancing through Nigeria's 3MTT Software Development programme. Builds frontend projects with JavaScript, HTML/CSS and Git/GitHub, and has a proven record of troubleshooting complex hardware and software issues, optimizing network performance and delivering reliable technical solutions. Driven by cybersecurity, web development and automation.

// WORK_EXPERIENCE

App Rollout & Support Team — KMC Hospital App

Sept 2026

KMC Hospital, Nigeria

- Supported the rollout of the KMC hospital app, helping staff get set up and adopt the new system in day-to-day hospital workflows.
- Provided first-line technical support: logged, triaged and resolved user issues, escalating complex faults to the development team.
- Guided staff through app features and collected user feedback to help improve usability and smooth the transition.
- Documented recurring issues and fixes to speed up future resolution and onboarding.

Freelance Tech Assistant

Jan 2023 – Date

Self-Employed, Nigeria

- Delivered smartphone setup, WhatsApp data migration and troubleshooting services for over 50 clients, ensuring seamless device functionality.
- Resolved hardware-level faults including microphone failures, connectivity drops and performance degradation, restoring full device utility.
- Built a repeat client base through fast turnaround times and clear technical communication.

IT Support (Part-Time)

Jan 2021 – Date

Local Business / Cyber Café, Nigeria

- Troubleshot and resolved hardware and software faults for 50+ computers and mobile devices daily, minimizing operational disruptions.
- Set up and maintained small office networks, ensuring consistent uptime and reliable connectivity.
- Configured software applications and provided end-user support for internet and system issues.
- Installed and configured Windows and Linux operating systems on 50+ laptops.

// PROJECTS

Solar Panel Setup

Ongoing

- Implemented a personal solar panel setup with exposure to low-voltage load management.

GSM Device Diagnostic & Repair Practice

Mar 2021

- Conducted diagnostic and repair practice on GSM devices, addressing basic faults.

Small-Scale 5-Device LAN Setup

Feb 2023

- Designed and implemented a small-scale LAN for a home/office environment.

Freelance Device Audit

Jan 2021 – Date

- Assessed and restored 50+ smartphones for community users.

// SKILLS

Languages: JavaScript, HTML/CSS

Backend: Node.js (Basic)

Web: Web development fundamentals, Git/GitHub

Networking: RJ45 crimping (straight-through & crossover), LAN setup, network fault diagnosis

IT Support: Hardware & software troubleshooting, PC repair, mobile repair, OS configuration, app rollout support, Solar PV maintenance

Hardware: GSM device repair, PCB diagnostics, PC assembly

Operating Systems: Windows 10; Linux (basic)

Tools: LAN tester, diagnostic utilities, Microsoft Office, Google Workspace

Data: Excel, Google Sheets (data entry, formatting, basic analysis)

// CERTIFICATES

- **Cybersecurity — Digital Training Academy (DTA) / Coursera** — In progress
- **TVET — Electrical & Solar PV Installation and Maintenance** — In progress
